**GLOBALSERIES “SKYTOWER SV06CNL/SV08CNL
(SV2032C/SV2632C FOR NORTH AMERICA)” WILL GO ON THE MARKET**

AICHI CORPORATION (President: Shinji Takeuchi) plans to launch a new wheel type scissor lifts “SKYTOWER SV06CNL/SV08C NL (For North America “SKYTOWER SV2032C/SV2632C)” for in February 2008. These models are Aichi’s first global series and are designed ideal for indoor constructions such as installation, painting, wallpapering and maintenance.

Aichi Corporation is a leading manufacturer of the Aerial Work Platforms and has higher market shares in Japan. We will focus on standardization of parts and systems and develop new products to meet market’s demands in order to expand the global market shares. In addition, we will offer a new quality assurance program. The details of this program will be announced at the show in February 2008.

North American models will be unveiled and displayed at the Rental show in Las Vegas from February 12-14, 2008. European models will be introduced by Aichi’s board members at the private show in the beginning of February, and those will be available for ride & drive to feel Aichi’s products as well as displayed. The followings are product outlines.

[Product Features]

(1) Advanced Driving Performance

AC Motor Driving and specially designed inverter make long duty cycles (1.5times compare to previous model) at the working sight.

And traveling speed is 1.5 times compare to previous model, so it makes reduction of moving time at the vast working sight.

(2) Proportional Steering System [Option]

New “Proportional Steering system” [Option] offers smooth operation as operators wanted.

And maximum steering angle (90 degree) offers excellent easy turn in a small circle.

(3) Lower the Stowed Position of Working Platform

•Low stowed height makes operator easily load tools and materials, and reduce fatigues and stress at up-and-down the stairs.

(4) Simple & Easy Maintenance

•Putting batteries into the drawer type battery case in order to inspect batteries easily.

•Placing main parts on the swing door type tray for easy repair and inspection.

•AC (Brushless) Driving Motor for reducing driving motor unit parts.

•By reducing the number of maintenance parts, reducing of the maintenance time.

[Specification]

Model	SV06CNL	SV2032C	SV08CNL	SV2632C
Maximum Platform Capacity	360 kg	800lbs	230kg	500lbs
Maximum Platform Height	6.10m	20.0ft	7.77m	26ft
Stowed Height	1,025 mm	40.4in	1,155 mm	45.5in

[Release] February 2008
